This is an interesting study and the authors have collected a unique dataset using cutting edge methodology. The paper is generally well written and structured. However, in my opinion the paper has some shortcomings in regards to some data analyses in respect to charts and graphs, and I feel this unique dataset has not been utilized to its full extent.

In entire article there is no single chart or graph is used to representation data

as it suggesion to please add some charts and graphs based on literature review to make paper more constructive as respect to literature based review article.
