Reviewer's decision and comments:

Dear editors/authors

I have read the above-mentioned paper, and below is my decision as well as my main comments:

The subject is very interesting and important.

My decision is to accept the manuscript with some revision

Here are my comments:

- It seems that figures included in the manuscript are copied from literature and previous studies, which is not allowed. to copy them without permission from their authors. Therefore, all figures need to be re-drawn completely and mentioned the references.

Page 7.

7.2. Field surveys. The entire paragraph needs to be re-written.

Page 8.

Table 1. Please re-draw the table and do not copy it as it is from another reference.

Page 12.

Table 2. Please re-draw the table and do not copy it as it is from another reference.

Page 18.

Summary and conclusion

Please re-write the last two sentences starting from: "That can be done through..... different researchers."
