The authors have done a great job with the investigation and the questionnaire design. The document is well written which is very appreciated. Although I am not an expert in Latin dance, through this research, a great passion for salsa dance was stimulated. I would like to give my suggestions, that is to explain the research objective more clearly and clarify the research gap between this study and previous research. Besides, it would be better if articles within 3 years could be properly introduced in literature review part.
