# Fluid Extract Dosage Form

National Cancer Institute

## Source

National Cancer Institute. *Fluid Extract Dosage Form*. NCI Thesaurus. Code C68991.

A solution or suspension distillate composed of active and/or inert ingredient(s) extracted from plant or animal matter and alcohol as the solvent and/or preservative. Fluid extract is prepared by percolation and subsequent evaporation such that the ingredient in each milliliter of the fluid extract is equivalent to 1 gram of the dried plant or animal derived matter.
