Potential competing interests: No potential competing interests to declare.

1. Authors must cite the latest relevant references.
 2. The abstract is unclear and should focus on the novelties of the work. It must be rephrased to reflect all major contributions.
 3. A discussion on existing relevant works is missing.
 4. Similarly, the results were not explained properly and must be added in the revised one.
- In summary, this manuscript needs to be revised thoroughly with a vivid demonstration of the objectives and novelties of the proposed work to make it publication-worthy.
