

# Review of: "Stellate ganglion block for anosmia and taste disturbance due to Long-COVID"

Xiangming Meng

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

This article has some scientific merit in the context of the COVID-19 pandemic. This article describes the successful use of a stellate ganglion block to treat Long-COVID-induced anosmia and taste problems. The author is inventive and has conducted useful research on the therapy of Long-COVID-induced anosmia. It is suggested that the author conduct additional prospective and large sample investigations.
