Potential competing interests: No potential competing interests to declare.

1. Nomenclature and acronyms should be organized and used appropriately.
2. Motivations for conducting this study are not getting clear in the introduction.
3. A more state-of-the-art literature review should be undertaken to cover various applications of the proposed approach.
4. The contribution of the paper should be clearly stated. What is new in the proposed approach concerning the objective function in comparison with the existing research?
5. Please provide the computation times for the case studies.
- 6- The results should be further elaborated to show how they could be used for the real applications. The paper shall not be discussed from the viewpoints of only one country.
- 7- What are the contributions of the paper: The authors should really explain the drawbacks of approaches in related works especially [4] to [5] instead of simply stating what they have done.
