Maternal uniparental disomy of chromosome 4

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Maternal uniparental disomy of chromosome 4. ORPHA:96180*

Maternal uniparental disomy of chromosome 4 is an uniparental disomy of maternal origin that most likely does not have any phenotypic expression except from cases of homozygosity for a recessive disease mutation for which only mother is a carrier.
