Potential competing interests: No potential competing interests to declare.

1. The author could discuss PCDD/Fs in the second paragraph of the introduction and why it is crucial to analyze them in environmental matrices near MSWI.
2. Can the author provide a schematic of all the studies carried out in different years (1998-2006) with sampling details and analyses done? It will help to visualize all the analysis and research done at the same time.
3. The author can add more details about the methods used to analyze PCDD/Fs in different samples and the risk assessment done.
