

# Review of: "The Impact of Study Environment on Students' Academic Performance: An Experimental Research Study"

Alboaie Lenuta<sup>1</sup>

<sup>1</sup> University of Iasi

**Potential competing interests:** No potential competing interests to declare.

**Positive aspects of the work:**

1. **Experiment-Oriented Research:** The study employs an experimental design to investigate the relationship between the study environment and academic performance, providing empirical data.
2. **Relevance for Educational Context:** The subject is particularly relevant in the context of modern education, especially in light of changes brought about by online learning.

**Aspects to consider for a future version of the article:**

1. **Limited Methodological Details:** There's a possibility that the methodology used might be insufficiently detailed, which could affect reproducibility and interpretation of the results.
2. **Limited or Non-Representative Sample:** If the study is based on a small or non-representative sample, this might limit the generalization of the results to a broader population.
