Early-onset autosomal dominant Alzheimer disease

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Early-onset autosomal dominant Alzheimer disease. ORPHA:1020*

Early-onset autosomal dominant Alzheimer disease (EOAD) is a progressive dementia with reduction of cognitive functions. EOAD presents the same phenotype as sporadic Alzheimer disease (AD) but has an early age of onset, usually before 60 years old.
