Thank you for inviting me to review the article titled "Optimizing Wastewater Treatment Performance System and Achieving Greater Efficiency to Improve Water Quality for Sustainability — A Review". It gives an overview on the wastewater treatment systems and the associated operation conditions.

- 1- Although the study objective is mentioned, the title includes some words that are not covered throughout the text.
- 2- For example, it's not clear what are the sustainability achieved ??
- 3- Also, the Introduction contains the word "a circular economy"; however, no any data about economics is mentioned in the paper!!
- 4- The discussion is very general and basics, without deep chemical or biological reactions, stoichiometry, and kinetics
