# Oncogene YES-1

National Cancer Institute

## Source

National Cancer Institute. *Oncogene YES-1*. NCI Thesaurus. Code C18349.

The gene product of oncogene YES-1 is associated with tyrosine kinase activity and its amino acid sequence shows high similarity with that of SRC. Multiple copies of YES-related genes occur in the human genome. Oncogene YES-1 is located at 18p11.31-p11.21.
