

Review of: "Artificial Intelligence & Nature-Based Solutions in Agriculture: A BT Cotton Pest Management Case Study in India"

Angelina Geetha

Potential competing interests: No potential competing interests to declare.

The concept and approach to the problem are detailed well. The authors are considering the impact of Artificial Intelligence in the field of agriculture.

However, it is suggested to include the literature review of a few latest articles and the list of keywords to be mentioned appropriately. It is recommended that the authors present the scope and outcome of their work in a more precise manner. Language correction is a must.
