First of all, thank you for the opportunity to review this article.

The article topic is quite nice. I have some advice for the writers.

1. The article title is quite long.
2. Why was the working period limited to 3 months?
3. It is not mentioned who diagnosed the patients.
4. How long after were the patients called for control?
5. The patients were not questioned about the presence of perianal disease during pregnancy.
6. What were the limitations of the article?

It would be appropriate to re-evaluate after adding these to the article.
