

Review of: "Online learning during the COVID-19 pandemic, lessons learned and what's next?"

Muralidhar Kurni

Potential competing interests: No potential competing interests to declare.

The authors do no statistical analysis to draw conclusions/predictions/suggestions.

Only a theoretical study is done.

But I appreciate the theoretical study done by the authors.

Even though this manuscript is based on personal observation, I will suggest the authors perform a statistical study to make their conclusions/recommendations strong enough.
