Alaskan Malamute

National Cancer Institute

Source

National Cancer Institute. *Alaskan Malamute*. NCI Thesaurus. Code C53760.

The Alaskan Malamute is a large, strong dog with a thick, coarse double coat and a plumed tail held over the back. The feet are furry and have tough pads. The coat averages 1-3 inches in length and comes in white, black and white, wolf gray, wolf sable (red undercoat with dark gray outer coat), or red, often with darker highlights and sometimes with a dark mask or cap. Height: 22-26 inches (56-66 cm.) Weight: 70-95 pounds (32-43 kg.)
