Abstract

This manuscript has been retracted.

This manuscript has been retracted due to plagiarism concerns. The legitimate authors informed us that their original article had been posted as a preprint on our platform by third parties who were not involved in its creation. An investigation revealed that the plagiarism could not be detected during the initial pre-posting checks, as the original article by the legitimate authors, M. Ponnamballeswari and K. H. Mamatha, published in Education and Society (Special Issue-1, Volume-I, April 2023), ISSN: 2278-6864, was not available online nor in any academic databases. Shortly before we were contacted by the rightful authors, the individuals responsible for the unauthorized submission had requested the removal of the preprint, but without providing clear reasons. Once the original authors reached out, a retraction, rather than a simple removal, was deemed necessary to address the situation transparently.
