

Review of: "Phytochemical Analysis and Antioxidant Activity of Extracts from *Berchemia zeyheri* — A Swazi Medicinal Plant"

Nikita Kanbarkar

Potential competing interests: No potential competing interests to declare.

Why did you choose only one, the DPPH radical scavenging assay, to study the antioxidant activity of the plant extract?

There are a few more assays that might have been performed in the study. Considering the IC₅₀ value of the ethyl acetate extract, what will be the future scope of this study?
