Potential competing interests: No potential competing interests to declare.

Originality: Interesting study for socio-economic

Title: specific and effective

Abstract:Furthermore, because Bank Plecit follows the principles of entrepreneurship through customer segment, customer relationship, and value propositions, we suggest it as the financial model that can be applied in the community economy of the countries whose citizens are ~~radical~~ in upholding their religious teachings. (radical = this is socially sensitive because it leads to issues of ethnicity, religion and race (SARA).

All the paragraphs in this article have not shown the relationship between religious sociology and socio-economics through explanations of methods that are straightforward and appropriate to the content. I provide suggestions for further development through appropriate social research methods so that new knowledge can be obtained in the field of study in this article. I hope that I will gain a broader understanding of the Bank Plecit phenomenon in Indonesia.

Thank you.
