

# Review of: "Development of Education for Sustainable Development Integrated Coastal Conservation Education Kit in Junior High Schools"

Anna Krakowiak-Bal

Potential competing interests: No potential competing interests to declare.

The idea of the article is interesting and valuable. The aim is to present an educational kit on coastal conservation suitable for use in Indonesian ecological materials and biological habitats. In my opinion, it is a great idea to help create sustainability awareness among people in this way.

The study is appropriately designed and developed. Perhaps more teachers should be involved in the study.

The literature review is good and used appropriately.

The work is interesting and has research potential.
