Potential competing interests: No potential competing interests to declare.

1. In the abstract, only the results of the work are mentioned. It is important to also include the general purpose of the study and a brief explanation of the methods used.
2. The introduction is too lengthy and may distract the reader, so it should be more concise.
3. In section 2.2 of the materials and methods, what type of product is the fermentation aimed at producing? Additionally, which specific bacteria was utilized for the fermentation process, and under what conditions was it conducted?
4. In section 2.2.1, the method of reporting results is discussed. Results should not be included in the Materials and Methods section.
5. Section 2.3 should be explained more fully or deleted.
6. The results and discussion are written very briefly and need to be compared with more studies and written more precisely.
