Potential competing interests: No potential competing interests to declare.

The article is well written.

The theme of the article is very relevant to the tragic situation of Technical Education in whole India

Growth of corruption in faculty and colleges is too bad

Twenty point Institutional Development Model is most wanted to improve.

All 20 points are too good.

Explicit indication of the following however will be more effective.

The author may like to add.

1. Synergy of colleges with industry is vital. Role played by faculty in building bridges between colleges and industry is critical to ensure job oriented education and placement of students in industry
2. Teaching research skills, innovation skills & entrepreneurship skills by faculty
3. Output of faculty in terms of innovation, research, publications and start-ups
4. Opportunities be provided by college to enable faculty to grow to international standard
5. Are professors ambitious to grow professionally or property minded
6. Patents, IPR, technology generation, knowledge generation
