Gestational choriocarcinoma

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Gestational choriocarcinoma. ORPHA:99926

Gestational choriocarcinoma is a gestational trophoblastic tumor (GTT; see this term) occurring secondary to pregnancy (ectopic or normal), miscarriage, voluntary termination of pregnancy (VTP) or a hydatidiform mole (see this term).
