Vacuolar myopathy with sarcoplasmic reticulum protein aggregates

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Vacuolar myopathy with sarcoplasmic reticulum protein aggregates. ORPHA:88635*

Myopathy due to calsequestrin and SERCA1 protein overload is characterised by mild myopathy or elevated levels of creatine kinase in the blood without associated symptoms.
