Abstract -

1. Please write in full the acronym eg SEI, when it is first time discussed.
2. Explain briefly the characteristics of the two groups.

Introduction

1. I do not see any discussion on the problem statements. Please provide this discussion.
2. Write the objectives clearly.

Theoretical Discussion

1. Please provide the definition of social entrepreneurs.
2. Please add discussion on Hockerts Model. Provide the discussion on the existing Hockerts Model, explain the existing variables under this model and discuss the new variable that the current study is proposing. It is good to draw the current model (provide a figure) and show the additional variable proposed to be introduced. Your discussion on the model is not arranged systematically. The reader is not able to understand about the model.
3. Explain the conceptual framework
4. Please correct the spelling for conceptual
5. What is the rationale off having mediating variable?

Measurement

1. For each variable, before the explanation of the measurement provide operational definition. There are 7 variables involved.
2. The location of the study, is at which part of Bangladesh? Undergraduate students of which universities?
3. What is the unit of analysis?
4. Explain the period survey of conducted?
5. How do you determine the population and sample size?
6. What is the sampling method?
7. Explain on the segregation of the 2 groups. What is the rationale of doing gender disparity?

The results

1. Provide discussion on the correlation. Don't just provide 1 or two sentences.
2. In the results, it refers to Tunisian data, but in the Measurement discussion, Bangladesh was mentioned. So which one is correct?

Conclusion

1. Tunisian or Bangladesh setting?

References

The references were not well written. Please improve.

Overall

Poor organisation of article. The discussion/ explanation needs to be enhanced.
