Pupils Equal Round and Reactive to Light and Accommodation

National Cancer Institute

Source

National Cancer Institute. *Pupils Equal Round and Reactive to Light and Accommodation*.
NCI Thesaurus. Code C87108.

While performing an assessment of the eyes, the examiner notes whether the pupils are equal and round, reactive to light, and have the ability to accommodate. If all findings are normal, the abbreviation PERRLA is noted in the examiner's account of the physical examination.
