Thank you for the opportunity to review this paper.

The topic is interesting.

I suggest you add an introduction in which you define the central concepts and research question. The research aim is not clear, and I need to better understand the purpose of your article.

You could probably do with better transitions between parts. What is the document's guiding principle?

I also suggest you explain the methodology that was used for this study.

You could enrich Part III (The possibility of resistance) with a look at the literature on techno-scepticism.

The bibliography is based on Spanish-language research only; broadening it to include English-language research would enable you to enrich your literature review.
