Lamina-Associated Polypeptide 2, Isoforms Beta/Gamma

National Cancer Institute

Source

National Cancer Institute. *Lamina-Associated Polypeptide 2, Isoforms Beta/Gamma*. NCI Thesaurus. Code C105103.

Lamina-associated polypeptide 2, isoforms beta/gamma (694 aa, ~75 kDa) is encoded by the human TMPO gene. This protein is involved in the mediation of nuclear structure.
