Potential competing interests: No potential competing interests to declare.

The article addresses a relevant topic for current tourism and the benefits derived from the implementation of Artificial Intelligence. It is recommended to list the consulted sources in the preferred format, and if these are up-to-date and from scientific journals, they would result in a broad theoretical-conceptual framework about the development of LLMs in tourism.

It would be important to clarify the methodology used and how the data were collected; this way, it is substantiated why those conclusions were reached. Additionally, it is recommended to generate a section that explains the challenges of LLMs in tourism with the support of a systemic approach. It is advisable to clarify the relationship between the ethics of LLMs in tourism and how data or privacy would be protected, as mentioned in the text.
