Review of: "Enhancing Project Performance Forecasting using Machine Learning Techniques"

Chandrasekar Rohith Bhat¹

1. Saveetha University, Chennai, India

Can you provide examples of how LSTM and ARIMA complement each other along with EVM in predicting project performance?

Can you provide specific examples or scenarios where LSTM and ARIMA have been successfully used together in similar forecasting applications?

What specific industries or sectors could benefit from this machine learning approach, and how might the implementation differ from the construction industry?
