CLU wt Allele

National Cancer Institute

Source

National Cancer Institute. *CLU wt Allele*. NCI Thesaurus. Code C84430.

Human CLU wild-type allele is located within 8p21-p12 and is approximately 36 kb in length. This allele, which encodes clusterin protein, may play a role in the modulation of complement activation, lipid metabolism and apoptosis. Genetic variation may play a role in Alzheimer's disease.
