The paper on Aquaponics for efficient household farming is **interesting and very timely**.

Following are my views and comments for betterment of the paper:

1-**Reorganize the abstract** so that it presents concisely: background, objectives, methods, main results (quantitatively) and conclusions and implications

2- **Reorganize the paper** in an article style and present the different sections of an article, which are Introduction (background/rationale/objectives), Methods, Results and discussions, and Conclusions and recommendations.

3-**Focus on application and clear contributions of the technology in household farming**

4-Ensure proper **idea flow throughout the paper**

5-**Citations are missing** in the body. So, include the citation of the listed and other relevant references in the body of the paper.
