Dear Mr Gabriele Marinello

Peer Review Team, Qeios

Thanks for sending me the paper entitled "Assessment of Quality of drinking waterbased on the water quality index method in Hawassa Zuria Woreda, Sidama Regional State, Ethiopia".

The paper shows good efforts and valuable data, but they are not used properly. Figures and tables are missing in this manuscript.

Data can be used in a better way to have contour maps and figures showing the comparisons especially with the WHO standard level.

The paper need more attention in editing (commas, capital and small letters, units, spaces,.... as shown in the text.

The English of the paper is good.

The abstract and the text in the paper are too long.

The paper may be published after reviewing the figures, tables, and doing the corrections mentioned in the manuscript.

Best regards,

Prof. Abbas Sharaky
