Peroxisome Biogenesis Disorder 8B

National Cancer Institute

Source

National Cancer Institute. *Peroxisome Biogenesis Disorder 8B*. NCI Thesaurus. Code C155763.

An autosomal recessive condition caused by mutation(s) in the PEX16 gene, encoding peroxisomal membrane protein PEX16. Peroxisome biogenesis disorder 8B is characterized by overlapping phenotypes of neonatal adrenoleukodystrophy and infantile Refsum disease.
