

Peer Review

Review of: "Qualitative Analysis of Technical Aspects of Filmmaking Processes in Hollywood, Asian Cinema, and the Award-Winning AIFF"

Edmundo Casas¹

1. Software, Menlo School, Atherton, United States

1. Clarity and Structure

Simplify long sentences and clarify abstract phrasing.

Ensure each sentence has a clear subject for better readability.

2. Terminology Consistency

Use consistent terms throughout (e.g., choose between “filmmaking” and “cinema production”).

Replace “lightning” with the correct term “lighting.”

3. Paragraph Transitions

Add bridging phrases to connect long sections and improve flow.

4. Use of Visuals

Reference tables and figures in the text (e.g., “as shown in Table I”).

Add captions or legends where missing.

5. Conclusion Refinement

Break down the conclusion into subsections: Technical Impacts, Applications, Ethical Issues, Future Directions.

6. Structural Enhancements

Add sections such as “AI Tools in Cinema,” “Ethical/Legal Issues,” and a “Comparative Timeline (2001–2024).”

Consider including a flowchart on AI evolution in film.
