Thank you for inviting me to review this paper that gives an overview of services available for substance/alcohol misuse disorders. It is clearly written, and I agree with reviewer 1 that it would be helpful to know the purpose of the paper and, more importantly, who it is aimed at. I support the suggestion that a definition of psycho-social rehabilitation will be helpful to set the context for the services that are described in the paper. Likewise, it would be helpful to know what definition of recovery is used. For example, is it a clinically or socially orientated definition, and how does this inform the services that are provided? I suggest that these revisions will strengthen the paper.
