Potential competing interests: No potential competing interests to declare.

The abstract should adhere to the international standards of abstract writing, including background, aim, methods, results, and conclusion.

Please check the manuscript for the use of acronyms; there is no need for them at single or minimal uses of words.

Please minimize the use of personal pronouns (we).

Please add the aim of the study at the end of the introduction section.

What is the rationale (why the study was conducted) and novelty (what the new findings are compared to the previous ones) of this study? Please add hints in the abstract and at the end of the introduction section.

Please check the figures and tables for statistical data (mean \pm standard errors or standard deviation, sample number, p value), and resolution.

Please refine the discussion section and support your findings with similar results. Please add contradictory results if present.

Please check the manuscript for minor grammar errors, syntax, long sentences, or paragraphs without reference citations.

What are the limitations of this study?
