GAIA Level 2 Assessment of Provider Initiated Preterm Delivery

National Cancer Institute

Source

National Cancer Institute. *GAIA Level 2 Assessment of Provider Initiated Preterm Delivery*. NCI Thesaurus. Code C127951.

GAIA Level 2 Assessment of Provider-Initiated Preterm Delivery is defined by three criteria: first, the patient is determined to be between 24 0/7 and 36 6/7 weeks gestation; second, a report from the delivering provider, based on recall, that there were no signs or symptoms of the spontaneous onset of preterm labor; third, additional documentation of the need to induce labor or to perform a cesarean delivery, resulting in a preterm delivery.
