**Potential competing interests:** No potential competing interests to declare.

The paper holds good literature backup with good amount of sketches and details. The same was expected in the study part as well, wherein it was mostly with unclear photographs and survey results. The study could have been further explored with the help of campus master plan and spot sections of different areas, so as to inform the readers the issues and threats. The way of showing the issue just with images are making the study a feeble one. The paper could be further revised with good study info and correlation between the same to literature and other data.
