

Review of: "Femmes finales: natural selection, physiology, and the return of the repressed"

Seyed Ebrahim Ahmadi

Potential competing interests: No potential competing interests to declare.

This paper offers a thought-provoking and challenging explanation of the antiquity of biology, and sheds light on some of the cultural and social influences that have shaped scientific discourse. The paper's focus on the relationship between gender and scientific discourse is particularly noteworthy, and highlights the importance of considering the social and cultural context in which scientific ideas are developed and debated.
