

# Review of: "Generative Artificial Intelligence Using Machine Learning on Wireless Ad Hoc Networks"

Shayma Wail Nourildean<sup>1</sup>

<sup>1</sup> University of Technology - Iraq

**Potential competing interests:** No potential competing interests to declare.

The subject is interested, but I have the following comments

The abstract must be rewritten to describe the aim of the study and the expected results.

The introduction must be a brief description of AI, machine learning, and ad hoc networks and the proposed method.

Then there must be separate sections for the theoretical basis, such as AI, ML, and ad hoc networks.

Can you simulate the network in any simulation program?

The conclusion is poor, and where the improvement in efficiency, which the author mentions in the abstract,

Can you draw a flow chart for the steps of the algorithm?

The language needs proofing.
