AIDS-Related Kaposi Sarcoma T0 (Good Risk): Localized Tumor

National Cancer Institute

Source

National Cancer Institute. *AIDS-Related Kaposi Sarcoma T0 (Good Risk): Localized Tumor*. NCI Thesaurus. Code C134971.

AIDS-related Kaposi sarcoma is only in the skin and/or the lymph nodes, and/or there is only a small amount of disease on the palate. The Kaposi sarcoma lesions in the mouth are flat rather than raised. (American Cancer Society)
