Potential competing interests: No potential competing interests to declare.

1. This research was well done, and the paper was well written.
2. In order to improve the article, the conclusion section should be improved.
3. In the conclusion section, try to use more information and conclusions from other countries' studies.
4. References are mostly old. Try to use new articles related to the work.
5. Many newer studies could be included to strengthen the references.
6. For example, studies have been conducted in Asian and European countries, in which studies have also pointed to the use of antibiotics by the people themselves. Try to use the results of the studies in those countries as well.
