Potential competing interests: No potential competing interests to declare.

First of all, I would like to thank the authors for their work in this field. I have read the manuscript titled "Drug Use Disorder and Coping Mechanisms Due to COVID-19 Pandemic Measures: A Cross-Sectional Survey" with great curiosity and interest.

However, I have some comments:

1. The main objective of the study is not clear in the introduction part.
1. The methodology lacks precision. The period of data collection was not mentioned.
2. It will be better to add the sample size formula reference.
