A thoroughly enjoyable paper. Well written & well researched. We were given a detailed account & understanding of a complex phenomenon. The introduction & background set the scene well, the methods were replicable and the results were detailed and logical. I am not a fan of bombarding the reader with quote after quote, always better to be interpretative and to foreground the author's voice. The author's should tell the reader what is important and what the significance is.

This is a paper that I will save and return to.
