Rare surgically correctable form of primary aldosteronism

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. *Rare surgically correctable form of primary aldosteronism*. ORPHA:231637

Surgically correctable forms of primary aldosteronism (also known as primary hyperaldosteronism; see this term) are characterized by unilateral aldosterone hypersecretion and renin suppression, associated with varying degrees of hypertension and hypokalemia.
