

# Review of: "Economics of Cattle Fattening - A Case of Bangladesh"

Alok Wankar

**Potential competing interests:** No potential competing interests to declare.

It's a good comprehensive study, dealing with the supply chain and the middleman. The cattle fattening and sale of meat can only be profitable when,

transportation costs can be reduced,

cost of feed and supplements can be lowered,

and all the middlemen can be minimized.

Animal husbandry can be a profitable and sustainable profession in rural and urban setups if done scientifically.

My congratulations to the authors for their sincere, ground-level exploration of the chosen topic.

Regards,
