Multivariate Time-Series Data Generation in Generative Adversarial Networks

The theme is interesting; however, it is lacking in some aspects as follows.

1. more related work is suggested.
2. The structure of the article is a bit confusing, and it is recommended to revise it.
3. details of the method need to be provided, including flowcharts or other forms of content.
4. More experiments need to be conducted to prove the effectiveness of the method.
5. Please double check the references, revise and add references.

I suggest revising the paper.
