

Definition

Total BCI contact event duration

Behaviour Change Intervention Ontology (BCIO)

Definition: A that is the total of intervention temporal parts within a behaviour change intervention.

Informal definition: The planned total duration of all sessions or digital contacts in an intervention or part

Curator note: "is about" contact events or "is about" duration of contact events?

*This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciosearch.org/>).
Comments and suggestions for improvements are welcome using the Qeios review system.*

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
